

**YOUR INPUT IS WANTED
FOR PROPOSED FIVE POINTS INTERSECTION IMPROVEMENTS!**

**An Input Session will be held on
Tuesday, September 27th @ 7:00pm, Room 21
(Selectmen's Meeting Room)**

Reconstruction of the Five Points Intersection is warranted. The Five Points intersection, which is in the vicinity of Chestnut Hill Avenue and Crescent Street (both are Route 32 in this area) currently suffers from a lack of defined traffic control and intersection sight distance. Sidewalks are limited to one side of the roadway and there are no delineated shoulders. The existing retaining walls along Crescent Street and Bridge Street are failing. Pavement rehabilitation is also needed. The Town is seeking Federal and State funding to assist in the re-construction.

John G. Morgan Jr., PE, PTOE, Section Manager – Massachusetts Highway of the engineering firm, CHA will be on hand to present information on the Town of Athol's recent Project Initiation Form with MassDOT on the proposed reconstruction of the Five-Points Intersection. Alternative re-construction options will be discussed.

For more information, please contact Doug Walsh, DPW Superintendent, at 978-249-4542 or email at supt@townofathol.org.
